Equinix London Data Centers

Equinix is the world's digital infrastructure company. Digital leaders harness our trusted platform to bring together and interconnect the foundational infrastructure that powers their success. Our London data centers are business hubs for more than 1,245 companies. London customers can choose from a broad range of network services from 205+ network service providers, and they can interconnect directly to customers and partners in their digital supply chain. Our facilities feature a dense concentration of financial services, internet service providers, cloud and IT services, enterprises, and content and digital media companies. The Equinix London metro consists of ten data centers (two xScale™ and eight International Business Exchange™ (IBX)) with approximately 964,000 square feet (89,575+ square meters) of colocation space.
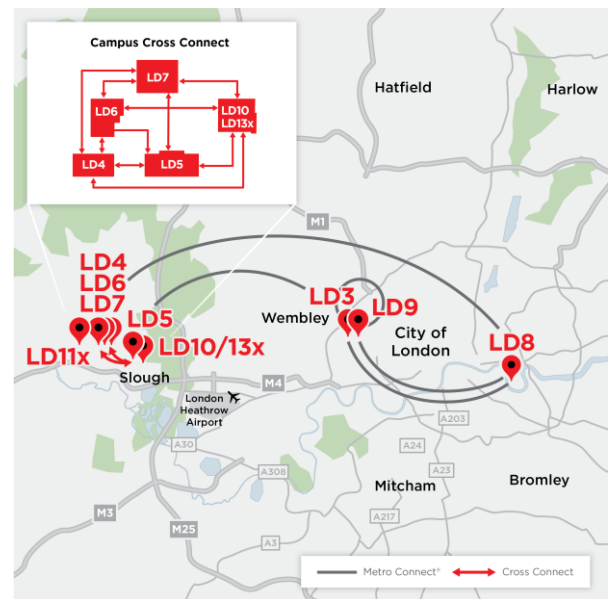

The London colocation facilities enable customers to be part of a rich industry ecosystem. These data centers are located in prime locations near one of the world's most important financial centers, are served by excellent communications links and offer unrivaled access to more than 30 European markets and 80 exchanges.

London Data Centers Benefits

- Access to U.K. media hubs in Soho and Manchester
- Home to the country's top five web portals and top five social networks
- Data center sites strategically located around central London for disaster recovery and business continuity
- LD4, LD5, LD6, LD7, LD10 and LD13x operate as a campus environment, providing simple and cost-effective connectivity options between buildings
- The Slough campus is strategically located in the heart of Europe's largest financial market
- Connection to multiple peering platforms including Equinix IX, LINX and LONAP
- Scalable technical space, leading operational resiliency and world-class security
- 100+ dedicated business continuity trading room positions
- Home to Europe's largest multilateral trading facility, BATS Chi-X
- London Slough data centers connected by two diverse routes of dark fiber
